registry: make distributed

02/13/2021 07:31 PM - q3k

Status:	New	
Priority:	Normal	
Assignee:		
Category:	hscloud	

Description

Currently the registry and registry's auth service run on some off the shelf ceph PVC-backed service:
https://cs.hackerspace.pl/hscloud/-/blob/cluster/kube/lib/registry.libsonnet

We make an alternative registry that would store image metadata on crdb, and even consider storing registry image blobs there, too (or on some local volumes).

This would let us run the registry (and thus a bunch of custom images) even if Ceph (and/or radosgw) is having issues.
