redmine: &lt; in code instead of angle brackets when pasting something that looks like an HTML tag

03/27/2021 12:09 PM - q3k

<b>Status:</b>	Resolved	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	informatic	
<b>Category:</b>		
<b>Description</b>		
This looks off:		
<pre>foo &amp;lt;bar&amp;gt; baz</pre>		
Naturally, this shouldn't look like this, and instead the block should contain angle brackets.		
This does not happen in non-code blocks:		
<pre>foo &lt;bar&gt; baz</pre>		
And also does not happen in code blocks if it doesn't "look like" an HTML tag:		
<pre>foo &gt;bar&lt; baz</pre>		

### History

<https://www.redmine.org/issues/4472>

Test:

```
foo <bar> baz
```

#2 - 03/27/2021 07:05 PM - q3k

So this is intended behaviour? :|

Yeah, it seems this is intended. Ugh.
