| **Description** |
|---|
| The new deployment of hackerspace.pl broke these. |
| There's a number of ways to solve this, which I'll get into in a bit. |

**History**

**#1 - 09/01/2021 12:05 PM - q3k**

Since currently hackerspace.pl is still hosted by boston and proxy-passed to new.hackerspace.pl, I just added the /~user/ location block back into Boston's nginx config.

Once we re-DNS hackerspace.pl onto k0, we'll have to put the redirect there somewhere.
