

hswaw - Bugless #74

Enable CSP for mastodon

10/09/2023 07:29 PM - implr

Status:	New	
Priority:	Normal	
Assignee:		
Category:	hscloud	
Description		
<p>Since somewhere around v4.1.4 mastodon recommends adding CSP headers on reverse proxies (see https://github.com/mastodon/mastodon/releases/tag/v4.1.4).</p> <p>We ignored this during the upgrade (https://gerrit.hackerspace.pl/c/hscloud/+1691), but we should eventually do it.</p> <p>Doing this in n-i-c is a bit tedious - it seems the only way is via snippet annotations, which we normally (for good reason) deny in admitomatic, so admitomatic would need to be fixed to allow this.</p>
